FREE Parent & Baby Course provided by the LONDON AMBULANCE SERVICE

Aimed at parents with babies or young children. It teaches the **basic steps for resuscitating infants** so that parents can feel confident at carrying out resuscitation techniques if ever required.

Modules covered

- ✓ Relevant infant anatomy
- ✓ Management of choking
- ✓ CPR for babies
- ✓ Febrile convulsions
- ✓ Burns & Scalds
- ✓ What to expect when dialling 999

Practical sessions

*During practical sessions, every attendee will have a chance to practice CPR or choking procedure on a baby manikin.

*All attendees are required to participate in the practical sessions in order for the trainer to check their technique and ensure that every member of the group can carry out CPR in the correct way.

What do people think of these LAS courses? *"LAS gives credibility", "Course content & presentation excellent", "Great job", "Overall excellent!"*
